### ***Community Outreach Proposal:***

#### **Dedicated Reporting District Officers**

For a 6-month trial basis, one officer, from each shift (total of four officers), will be assigned to act as a direct conduit between the citizens in a specific reporting district and the police department.

- The police department will notify citizens via newspaper and mailing that specific reporting districts will have a dedicated officer to address their needs.
- The dedicated officer would answer questions, concerns and complaints from citizens living within specific reporting districts.
- The dedicated officer would encourage citizens to participate in public safety meetings.
- Assigned officers will keep track of all citizen initiated contacts, the nature of each contact, number of public safety meetings, and any other information that could determine the benefit of this proposal.

Note: Crime and other type of reports will continue be taken by the regularly assigned beat officer.

At two-month intervals, and at the end of the trial basis, information gathered from each officer will be analyzed to determine the use of the officers services, officer's time used for this proposal, types of requests, and viability of continuance of this proposal.
