

Cart Size	Height (A)	Lid Ht. (B)	Width (C)	Depth (D)
35 gal.	38.2"	60.5"	22.8"	22.3"
65 gal.	42.2"	69"	25.9"	26.5"
95 gal.	46.1"	77.7"	27.7"	31.6"

It is optimal if you can provide approximately 150% of the sum of the cart footprints to easily maneuver the carts into and out of their storage spaces. At 150% the footprint dimensions are:

Size of 3 Carts	Height (A)	Lid Ht. (B)	Width (C)	Depth (D)
35 gal.	38.2"	60.5"	103"	34"
65 gal.	42.2"	69"	117"	40"
95 gal.	46.1"	77.7"	125"	48"

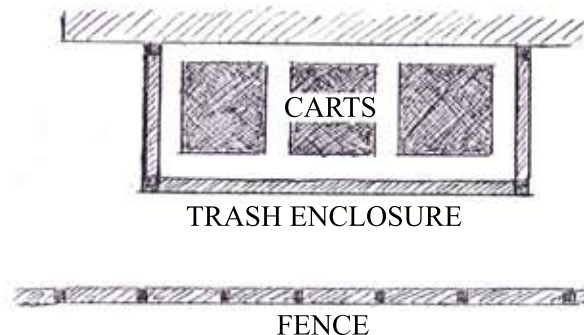

### ENCLOSURE SIZE:

Trash enclosures need to accommodate the size and number of carts you routinely use. Most Piedmonters have three 35 gallon carts: a black one for trash, a blue one for recycling, and a green one for yard waste and food scraps (organics). Piedmonters who have back yard pick-up service are limited to 35 gallon carts, but those who need more than one cart for recycling or organic waste, may have as many carts as routinely needed at no extra charge (remember, you may order occasional “overage bags” for large yard clean up projects at no charge). Piedmonters who opted for curbside pick-up, may use larger carts if routinely needed, but must properly store and screen them.

Most side yards in Piedmont are at least 4’ to 5’ wide, which can accommodate 35 gallon carts next to each other against the wall of the house or along the fence, and still leave 2’ to 3’ feet for access to the rear yard. This means that as long as you have a 4’ side yard, and at least 6 feet along the wall of the house or fence, you will have enough space for all your 35 gallon carts.

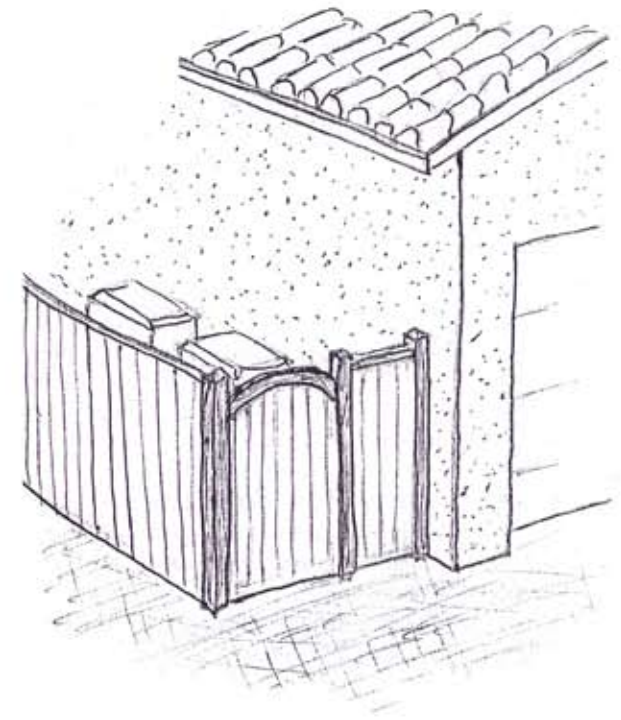

If you are not able to provide an enclosure in compliance with the above criteria, please contact the Planning Department at 510-420-3050 to schedule an appointment with a planning staff person who will assist you with the proper placement of your carts and the design of an enclosure. No fees for the consultation or process are required.

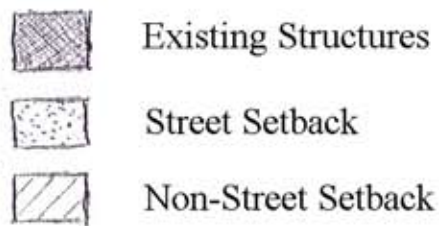

## CITY OF PIEDMONT

## TRASH ENCLOSURE INFORMATION

**Trash Enclosures:** Any solid fence, wall, or combination of a fence and wall at least 4' in height and up to 6' in height; open fence up to 6' in height in combination with dense evergreen landscaping at least 4' in height at maturity and up to any height; or dense, evergreen landscaping at least 4' in height at maturity and up to any height shall be constructed in compliance with the following:

**Non-Street Setback Areas:** Trash enclosures in compliance with this section may be permitted in any non-street setback area without the need for a building permit or design review.

**Street Setbacks:** Any Trash Enclosure used exclusively for the purpose of screening trash, recycling and organic waste carts from public view that is located within a front yard setback, a street side yard setback, or a rear yard setback of a through lot, shall require staff review and approval at the Planning Counter in compliance with the provisions of Section 17.17.1(c)(ii) of the city code and the Trash/Recycling/Organic Waste Cart Enclosure Policy, except that staff may refer any application to the Planning Commission for review. The enclosure shall be:

1. Located as far away from the street as possible;
2. As small as is necessary to enclose the carts;
3. As low in height as necessary to adequately screen the carts; and
4. Designed in compliance with Category 5 of the Residential Design Guidelines
